

# Supplementary form for additional accommodation groups

Forms part of the *Application form for refundable accommodation deposit (RAD) approval*

Use this form if you have more than 6 accommodation groups in your application. **Use the main form to record the information for accommodation groups 1 – 6.** Use this form only to record information for accommodation group number 7 and onwards.

## If you need help

If you need help, please refer to page 1 of the main application form, or the Help sections from page 8 of the main application form.

## How to submit

This form must be submitted with the main application form, data sheet and any other supporting documentation.

 We will be unable to assess your application if you only submit this form.

## Accommodation groups and rooms

### 5. Accommodation groups in your aged care home

List and describe accommodation groups (from group 7 onwards) for which you are applying for a RAD price. Include a brief summary of features common to each group. Explain how each group is different from other accommodation groups in this aged care home, including groups that are not in this application.

#### Example description:

This group offers an electronic king single bed, walk-in wardrobe, flat screen TV, air-conditioning and ensuite in all 10 rooms, a balcony in 6 of the 10 rooms, the same window dressings in all rooms, and exclusive access to the rooftop terrace for all rooms. This group is different from the classic accommodation group because it offers higher quality furniture, larger room size, and better views.

| Accommodation group name | Number of rooms | Proposed RAD price per room (\$) | Maximum number of residents in the room | General description (suggested max. 150 words) |
|--------------------------|-----------------|----------------------------------|---|--|
|                          |                 |                                  |   |  |
|                          |                 |                                  |   |  |
|                          |                 |                                  |   |  |
